

# DRY-DOCKING OPPORTUNITY

## ANNOUNCING NEW SERVICE!

Offshore Inland Marine & Oilfield Services have formed a strategic alliance with Boa Marine Services to provide Heavy Lift, Dry-Docking services for the following type vessels: Subsea Construction, Dive Support, PSVs, OSVs, Handy size carriers, Ocean going and inland barges, jack up rigs, lift boats, and even small to medium sized semi submersibles.

In addition to this dry-docking capability, our full service offerings are still available:

- Engineering, design, and fabrication,
- Heavy pipe, structural, and mechanical fabrication,
- Hull and mechanical repairs,
- Thruster and tail shaft inspections and change outs,
- Decontamination, hull blasting and painting,
- Class Specials inspection access,
- Power management and electrical repairs,
- HP piping and hydraulic system replacements,
- Joiner package repair and installations,
- Short and long term equipment storage (inside and out)

Although we remain in concert with our reputation as a mobile shipyard, this new service is also Mobile. Regardless, we have arranged to provide this service in the Mobile / Pensacola area.

## We can come to you!

### Dry-Docking Capabilities:

With a proven reputation for completing some of the most challenging projects, Offshore Inland now offers dry-docking services as well.

Available submersible barges:

- Barges range from a length of 120 to 144 meters and a width of up to 36 meters (118 ft).
- Barges provide a lifting capacity up to 26,000 DWT with as much as 34 feet of water over the blocks.
- With no wing walls, the use of work barges allow for much wider rigs and vessels.
