

## PORT OF GALVESTON

Offshore Inland offers rig and ship repair as well as equipment assembly, staging and integration at this location with the following advantages:

LONG.: 29,18'05.86"N  
LAT.: 94,50'06.53"W

**The described deep-water facility is perfectly positioned to support the Texas and Eastern Gulf offshore projects and assets.**

- 10 fully secure acres of easy access, project area for storage, lay down, equipment testing, and equipment modification.
- Over 20,000 sq ft of covered warehousing and fabrication support.
- Adjacent to 1000' deepwater private quayside with 5 acres of project area.
- Additional 30 acres of additional, open project area with developed dockside facility with shallow water (barges) channel (15 ft deep)
- Less than 2 mile from a Major Interstate and only about 10-15 miles (less than 2 hours) from the sea buoy.
- Access to over 2000 feet of useable dock space in public docks with nearly 20 acres of project area adjacent to deep water dockside.
- Full access to adjacent roadways, approaches, rail trackage, equipment and materials storage, including a 45-truck queuing area on project dock area.
- Much more covered warehouse space available.
- The entrance to the main channel to Port of Galveston is direct access to the Central Gulf. The channel is about 500 feet wide at its seaward end and dredged to 38 feet in depth. Covered railcar loading and unloading. On-dock rail service provided by CSX Transportation, Burlington Northern Santa Fe Railroad, and Rail America (Alabama & Gulf Coast Railway).
- Fully managed and staffed repair and project support team with highly efficient, experienced and professional labor force.
- We have a all necessary handling equipment, crane support for all your needs including heavy lifts at reduced rates.
- Detailed corporate resume including repair and project support of most major oil and gas support companies.

**OFFSHORE INLAND WILL SUPPORT THESE ABOVE PROJECTS WITH THE FOLLOWING ONSITE SUPPORT:**

- **With onsite coordinators adhering to the highest level of environmental and safety standard**
- **Quality control team following the strictest Class and Workmanship control**
- **Project management design and engineering services**
- **In house full compliments of craftsman including certified welders, fitters, mechanics, etc.**
- **24hr security**
- **Project offices**
- **Procurement and logistics support**
